Professional Profile

I am a recent graduate Junior Full Stack Developer and I enjoy developing web, mobile, and ERP solutions. I focus on improving my coding skills and creating useful and functional software. Recently, I have been concentrating on cross-platform mobile app development using React Native and working on projects. Outside of software development, I also work on cybersecurity and try to improve myself in this area. This helps me to approach problems more analytically and with a focus on testing.

I also have knowledge about Cisco network systems, Linux operating system, and basic information technology.

I am open to learning, curious, hardworking, and problem-oriented. I work well in a team and pay attention to writing clean and sustainable code. I am also someone who thinks ahead.

Career Summary

May 2025 – August 2025

The Code Republic OÜ, Istanbul – Fullstack Developer Intern

Outline

I have taken part in the development, management, and testing of web applications in both back-end and front-end. I was responsible for database operations using Supabase.

Key Responsibilities

- Developing functional and efficient website features using TypeScript and Tailwind CSS.
- Next.js and Node.js were used in the website development processes.
- Worked with Supabase for efficient database handling and data management.
- Participated in team based project development, ensuring clear communication and shared responsibilities.
- Designing and developing secure and scalable RESTful APIs.
- Testing and reporting RESTful APIs using Postman.

Temel Yetenekler

- Full Stack Development
- Database Management
- Backend as a Service
- Linux
- Cyber Security
- Virtual Machines
- Postman
- Tests
- Project Planning

Education

- **Istanbul Beykent University – Computer Programming**
September 2023 – August 2025
GPA: 3.76/4.00 | High Honor Certificate

Additional

Programming Languages

TypeScript, JavaScript, C#, Java, SQL, Python, PHP, C

Databases | Cloud Databases

Microsoft SQL Server, MySQL, PostgreSQL, MongoDB | Firebase, Supabase

Projects

Fitol - I developed an Android app focused on calorie tracking, step counting, and promoting a healthy lifestyle. I also worked as a team leader.

Library Management System - Developed a library management system using DevExpress that tracks users, books, and staff, providing an effective and valuable tracking solution.

Password Generator Application - Developed an application that generates secure and random passwords to enhance user account safety.

Moodex - Moodex is a mobile app that analyzes users' moods and provides them with personalized motivation and helpful suggestions. I am currently continuing the development process on my own.
